
Rapid Rail
Post & Rail Fencing

Post & Rail

Fencing System

Rapid Rail is a modern steel post and rail fencing system designed for residential, lifestyle, commercial and landscape applications.

Manufactured from G300 - 0.75mm steel, the Rapid Rail system delivers a strong, lightweight and low maintenance fencing solution with a clean architectural appearance.

The modular design allows for fast installation and flexible fence configurations.

Suitable for:

- Residential boundaries
- Lifestyle properties
- Commercial developments
- Driveways
- Landscape applications
- Feature fencing

Rapid Rail. Redefining the Fence Line

Key Features

- G300 - 0.75mm steel construction
- Custom rail lengths available
- Available in multiple rail configurations
- Fast installation system
- Low maintenance
- Lightweight strong design
- Modern architectural appearance
- Modular rail system
- Suitable for residential and commercial applications

Post Height Configurations

Configuration	Finished Height	Overall Post Length	In-Ground Depth
2 Rail System	900mm	1500mm	600mm
3 Rail System	1000mm	1600mm	600mm

Applications

Rapid Rail is suitable for:

- Residential boundary fencing
- Commercial developments
- Landscape projects
- Lifestyle blocks

Installation Overview

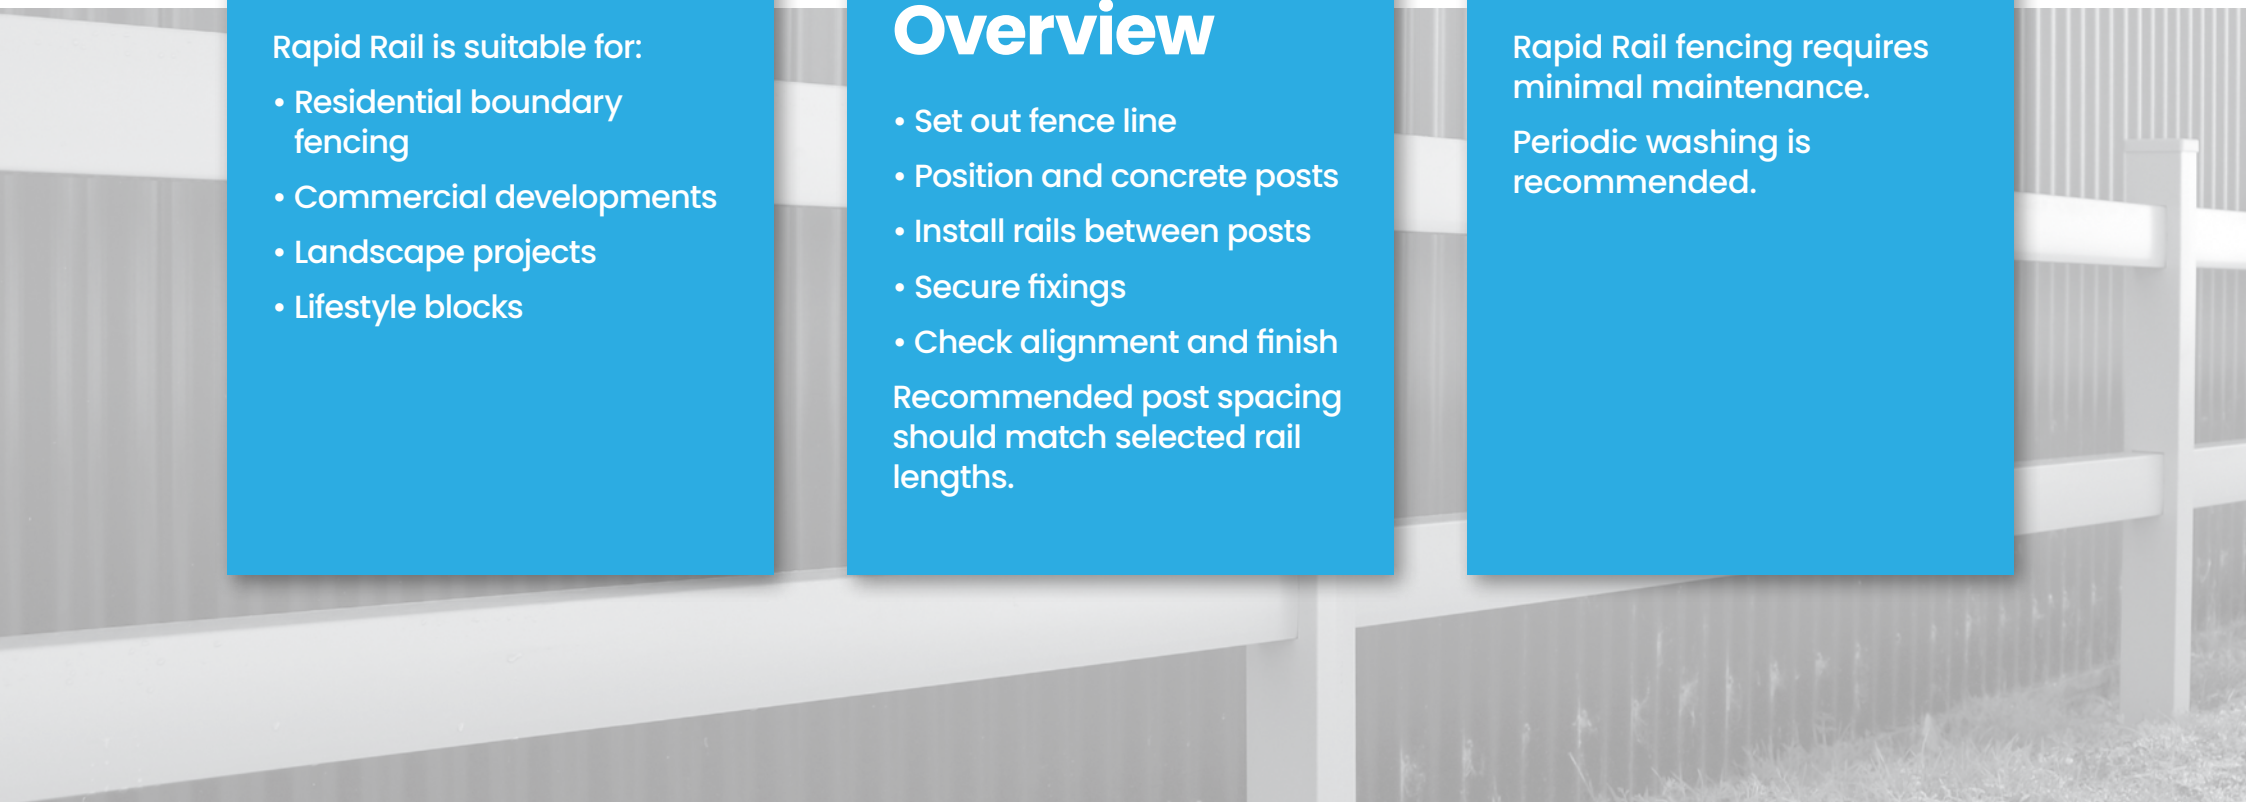

- Set out fence line
- Position and concrete posts
- Install rails between posts
- Secure fixings
- Check alignment and finish

Recommended post spacing should match selected rail lengths.

Maintenance

Rapid Rail fencing requires minimal maintenance.

Periodic washing is recommended.

Technical Specifications

Post Size	100 x 55 box section
Rail Size	100 x 55 section
Rail Lengths	2200mm/2400mm
Custom Lengths	Available
Steel Thickness	0.75mm
Steel Grade	G-300
Installation Type	Post and rail system
Applications	Residential/Commercial/Landscape
3 Rail Finished Height	1000mm
2 Rail Finished Height	900mm
3 Rail Post Length	1600mm overall
2 Rail Post Length	1500mm overall
In-Ground Depth	600mm typical
